SYSTEM HEALTH CHECK

On a highest performance level

To make sure your system is fully operable and maintainable, Rohde & Schwarz can organize on-site system health checks by technical support engineers.

The health check of system content by Rohde & Schwarz is essential to performance testing and ensuring healthy and verified systems. This enables the earliest possible detection of system failures or performance issues. Rohde & Schwarz performance checks also help with cost-effective maintenance for reliable and fail-safe systems. [1]

[1] Repairs, patches and further maintenance measures are not included but can be ordered separately.

Contents
► System performance check
► System analysis
► General system evaluation
